

# Bars & Restaurants

#### What is ambience?

Ambience is everything that surrounds us, every stimulant recorded by any of our senses. Smart hospitality businesses these days are prioritizing the experience of clients. The finest cooking, cleanest silverware and the most elegant design hold sway in most contemporary venues.

But what about sound? Visitors who enjoy the music are far more likely to spend more time in any setting. The used audio system in this encounter, is undeniably as crucial as the music being played.

# AUDAC Touch™ 2 Amplify sound, simplify control

AUDAC Touch™ 2 completely changes the way an environment can be operated. By offering a freely available out of your pocket total system solution not only the sound system can be operated very easily, but third party equipment such as projector screens/lights can be controlled effortlessly as well. Audiovisual users choose AUDAC Touch™ 2 because they can fully personalize their own dashboard and add and control audio sources or streaming services such as Spotify.

With the needs of our users always in our minds, we have ensured that AUDAC Touch™ 2 goes far beyond the functionalities of the automatically recognized products.

Visit audac.eu/touch for more information.

#### Adaptive dashboard

Fully flexible positioning and scaling allows you to design and group your dashboard according to your own preferences. Custom naming offers an intuitive and user friendly interface according to project specific requirements.

#### Now playing

Currently playing media player information including album covers and additional carried information can be displayed on the main dashboard. Additional widgets for control can be separately selected.

#### Basic 3<sup>rd</sup> party toggle control

Relay unit controls can get implemented, offering countless possibilities for expansion of your AV system to become a total system control platform.

#### Licensed streaming\*

The NMP40, a professional audio streaming SourceCon™ module for Spotify™ and Soundtrack Your Brand© is now supported, allowing you to easily integrate and control both streaming services from within the application.

\* Note that your national legislation may be different for your territory, check the website for more information.

#### Output widget

Input selection and output volume adjustment is made possible through graphical slide faders combined with drop down menus

## High-end ceiling speakers

The CELO series is AUDAC's high-end slim ceiling speaker series, consisting of four models which guarantee an optimal experience for every situation and application.

#### CELO2

2" High-end slim ceiling speaker

The ultra-compact size enables the CELO2 to smoothly integrate into any interior like no other loudspeaker. The 2" full-range aluminum cone driver is fitted in a ported enclosure with closed backcan. This way, a clear and crisp sound is guaranteed with an improved response in the low frequencies.

20W

8 Qhm

16 Qhm

#### CFI O5

5" High-end slim ceiling speaker

The uncompromised design of the CELO5 results in the ideal match between quality and size. It produces a stunning sound which is extremely detailed and clear. The two-way construction consisting of a 5" aluminum cone woofer and a complementary 1" dome tweeter are smoothly matched using a highquality crossover network.

Available colours:

#### CELO6

6" High-end slim ceiling speaker

The perfect match for a large number of applications is realised with the CELO6 loudspeaker. This loudspeaker consists of a 6" aluminum cone woofer with a complementary 1" dome tweeter. This combination guarantees the perfect harmony and balance of sound, allowing you to accurately distinguish each element of your favourite songs.

Available colours:

#### CFI O8

8" High-end slim ceiling speaker

The most powerful of its kind is the CELO8 loudspeaker, which is constructed using a 8" aluminum cone woofer and a complementary 1" dome tweeter. This combination allows the loudspeaker to reach lower frequencies which results in a high-fidelity sound with powerful and detailing low frequencies, unheard of in its class

#### Guiliano pastabar

Maasmechelen, Belgium

The Giuliano pasta restaurant chain chose AUDAC for its entire audio system in Maasmechelen, Belgium. The large complex with over 180 seating spots and more than 40 staff members is located in shopping centre Maasmechelen Village. Due to the high ceilings and the size of the venue, both the local AUDAC dealer S2 Pro and end customer relied on AUDAC's experience for the choice of models and location of them. In total they installed 10 x ATEO6 loudspeakers at the larger dining area with 2 x SX408 complementary 8" subwoofers.

The restaurant also houses an orangerie where 8 x CELO8 ceiling speakers provide an ideal audio solution. For the kitchen, toilets and washing area they chose for a combination of CS75 ceiling speakers and WX502/OB weatherproof wall speakers. Besides the sub cabinets which where powered by DPA series amplifiers, the complete installation was powered by the digital CAP series multi-channel 100V amplifiers. To divide and control this audio system into separate zones they installed a web based MTX88 audio matrix

The result is an astonishing sound troughout the complete restaurant satisfying each customer with detailed Italian classic music.

## Wall panel control

This extremely efficient way of controlling your user interface is incorporated in AUDAC wall panels, WaveDynamics™ amplifiers, audio players and MTX matrixes. It allows an easy and user-friendly way of controlling volume and more advanced settings such as EQ and source selection. The Scroll-Push™ button also provides a design advantage to the front of the device by replacing a large selection of buttons.

#### DW5066

Digital all-in-one wall panel

Whether it is for local audio source/volume control or for full installation/scene selection management, the DW5066 is a user-friendly interface peripheral for R2/M2 matrix systems. In addition, built-in RCA line source inputs and an XLR microphone input (15V phantom power available) are locally mixable, the signal which can be patched to any output zone. These inputs may also be configured as outputs.

# Compact wall speakers

The ATEO is a series of extraordinary loudspeakers specially designed for fixed installation indoor applications, ranging from modern residential applications to the most demanding designer applications in environments such as retail stores, pubs, restaurants or even clubs.

#### ATEO2

2" Wall speaker with CleverMount™ bracket

The ATEO2 consists of a 2" full-range aluminum cone speaker guaranteeing a clear and crisp sound with minimal visual impact, fitted in an elegant and compact enclosure.

driver, ensuring a true-to-nature, high-fidelity

#### Café Panenka

Rotterdam, the Netherlands

Panenka is a luxury sports bar and restaurant with a touch of gentleman's club in the center of Rotterdam. They also offer different meeting rooms for hire while the entire setting is divided in two floors. Because of their complex multi-room layout, they were looking for an audio system that could be controlled with ease from every room. The AUDAC partner FrameWave found a solution for their issues and introduced them to the MTX48 4-zone audio matrix.

In this stylish sports bar you can now control the volume and audio input in every of the four rooms. When the game is over you now have the possibility to switch from the television audio to a music source thanks to the MWX45 wall panel controllers and MWX65 all-in-one wall panel that are installed in every room. FrameWave even provided Panenka with a special application that can be used by the staff members and their customers. The AUDAC Touch™ application enables them to control the complete system from their pocket when the bar is too crowded to reach the wall panels. Customers are able to use the same application and can select the same playlist when they are moving from room to room.

The AUDAC Touch™ app can be configured in different user levels so that the customers who use the app don't control anything more than they need to.

Now you can enjoy a rugby or football game in style on a 150" full HD screen while listening to a pair of ATEO4 wall speakers powered by a DPA154 quad-channel Class-D amplifier. The main bar is equipped with ATEO4 wall speakers in combination with a BASO10 bass reflex cabinet that are powered by a SMQ350 WaveDynamics™ quad-channel power amplifier.

# Universal wall speakers

The WX- series offers a wide range of solutions for both outdoor as indoor applications. Thanks to a watertight connector, a durable ABS housing, a specially designed drain hole and a DuraWeather™ coating, this range has an IP55 rating and has proven its worth for decades in extreme weather conditions.

3" wall speaker 2-way

The WX302 is a 2-way performance speaker with a 3" low frequency loudspeaker and a 1" dome tweeter. The WX302/O is specifically designed for outdoor use and lends itself to a variety of applications, ensuring true to nature, high fidelity reproduction of music and speech.

100V

Available colours:

#### WX502MK2

5" wall speaker 2-way

The WX502 is the 5 1/4" version of the series fitted with a 1" dome tweeter. The elegant shaped synthetic enclosure is available in two different colors (black & white), making it blend into any environment.

Available colours:

8 Qhm

WX502/C

#### WX802MK2

8" wall speaker 2-way

The WX802 is the most muscular version of the series with a 8" low frequency loudspeaker and a 1" dome tweeter This combination ensures a solution for a large number of outdoor applications.

WX802/C

# Chiapas Taco Cartel Amsterdam, The Netherlands

The Chiapas Taco Cartel is a Mexican chain restaurant in The Netherlands with 2 venues: one in the capital Amsterdam and one in The Hague. At both restaurants, they try to serve the best food, inspired by the southernmost province of Mexico "Chiapas". This region is best known for its street food, cabdrivers and beautiful nature. Taco Cartel offers the tastiest tacos. burritos and other Mexican snacks. Besides the good food, they like to keep it simple: there are no waiters, glasses or knives outside of the kitchen. It's self-service with a smile which creates that real street food feeling!

Both venues in Amsterdam and The Hague uses different audio setups to meet the different needs in each restaurant. The venue in Amsterdam uses 4 WX502 universal wall speakers that distribute the authentic Mexican music equally throughout the restaurant. These speakers are powered by a single DPA152 dual-channel amplifier.

#### Melt pizzeria

Adelaide, Australia

The team responsible for some of Adelaide's best drinking and dining venues have opened their third Melt Pizzeria restaurant and bar at Henley Beach, a seaside suburb, less than 10 kilometers from Adelaide's city centre.

With a seating capacity of around 200 people, Melt Pizzeria features multiple indoor and outdoor spaces. Bifold windows and doors down one side of the building allows the spaces to flow together and provides the perfect spot to sit back with a glass of wine and look out over the ocean.

Micah Taylor, owner of M Higher Fidelity is the go-to man in Adelaide's hospitality scene and having worked on the owners' other venues around town, was quickly enlisted to provide a top-notch audio solution for the entire space.

In collaboration with our Australian distributor Audio Logistics, Micah decided to install a combination of ATEO2 compact wall speakers, CELO2 and CELO8 high-end ceiling speakers and MERO high-end in-wall speakers from AUDAC throughout the indoor areas, providing high-end audio reproduction from compact, low-profile speakers which seem to disappear into the interior design of the spaces. A pair of BASO12 bass reflex cabinets 12" subwoofers extend the low-frequency capabilities of the system.

Outside, a combination of WX802\_O and WX502\_O outdoor wall speakers are able to stand up to the harsh conditions of the seaside location whilst ensuring that outdoor customers are not left in silence. As the venue is made up of many separate spaces, an MTX88 8-zone audio matrix was a necessity to allow each area to be fine-tuned to the optimum listening level, no matter what time of the day or night it is.

## QuickFit<sup>™</sup> ceiling speakers

AUDAC's high-quality in-ceiling speakers deliver exceptional sound quality and value for a wide variation of applications, ranging from paging and announcements to background music systems in a wide range of business applications, including hotels, restaurants and pubs, corporate offices, retail stores, etc. The ceiling mounting of all these speakers can be achieved with a QuickFit™ mechanism, offering great installers convenience and lifetime stability.

#### CIRA5

Quickfit ™ 2-way 5 1/4" ceiling speaker with TwistFix™ grill

The CIRA5 features a 5 1/4" driver using polypropylene cone material, combined with a 1" Mylar tweeter fitted with a phase plug for excellent off axis performance. A continuous power handling of 30 Watt (RMS) and maximum power handling of 60 Watt is achieved, while fitted with a multi-tapping 100V line transformer with tappings for 6W, 3W. 1.5W and an 8 Ohm or 16 Ohm bypass connection.

Available models: CIRA506, CIRA524 and CIRA530D

#### CIRA7

Quickfit ™ 2-way 6.5" ceiling speaker with TwistFix™ grill

The CIRA7 is a 2-way coaxial ceiling mount loudspeaker with a 6.5" low frequency driver. The CIRA7 is especially designed to offer an unmatched solution for a wide range of business applications, including hotels, restaurants and pubs, corporate offices, retail stores, etc.

Available models: CIRA724 and CIRA730D

Available models: CIRA824 and CIRA840D

Available colours:

#### CIRA8

Quickfit ™ 2-way 8" ceiling speaker with TwistFix™ arill

The CIRA8 is the most muscular version of the series with a 8" driver using polypropylene cone material combined with a 1" Mylar tweeter. The selected materials guarantee a low distortion performance with smooth and flat frequency response.

#### Pazuzu Club

Corfu, Greece

One of the most popular beaches on the island Corfu is Glyfada. Located 16 km west of Corfu Town it is home to many watersport facilities, shops and clubs. The Pazuzu Club is one of the most important clubs on the island. Because of AUDAC's wide range of outdoor loudspeakers, the choice was obvious to the owners.

This unique environment faced some challenges during the design. Not only did the speakers have to be resistant to extreme weather conditions and salt exposure on the beach, the club also needed to provide an impressive sound experience to visitors in and around the club. In order to create the right atmosphere, a combination of WX802/OB, WX502/OB and WX302/OB 2-way loudspeakers were installed, together with complementary BASO12 compact 12" bass reflex bass cabinets. To cover the large beach area, HS212MK2 horn loaded 2-way loudspeakers are mounted on top of the terrace.

For the amplification they chose a COM12MK2 public address amplifier for the 100V lines while the larger system was powered by a combination of SMA350, SMA500 and SMQ350 WaveDynamics™ power amplifiers. Thanks to the WaveDynamics™ dsp processing inside the amplifiers, the installer was able to load the exact preset for each loudspeaker enabling the most accurate speaker protection and acoustical optimization for this application.

#### Full-range wall speakers

The XENO series is a loudspeaker range specifically designed for fixed audio installations in modern environments, offering two different sizes of contemporary and elegantly designed products.

What makes them so unique is their full-range audio design, allowing them to be used without additional bass cabinet.

The exceptional accuracy and clarity coming from the VEXO8 is recommended to be extended with a complementary bass cabinet adding the punchy and deep bass, resulting in a stunning sound over the entire frequency range.

#### XENO6

6" Full-range loudspeaker cabinet -2-way

The XENO6 is the 6" version, featuring a 1" dome tweeter and a 6" Mid / Low frequency driver, ensuring a high-fidelity sound. This wooden cabinet is fitted with a slim and elegant front grill.

Available colours:

#### XENO8

8" Full-range loudspeaker cabinet -2-way

The XENO8 is the 8" version, with a 1" dome tweeter and a 8" Mid / Low frequency driver, ensuring a true-to-nature, high-fidelity reproduction of music and speech. This wooden cabinet is fitted with a slim and elegant front grill.

Available colours:

#### VFX08

8" High-power loudspeaker cabinet - 2-way

The VEXO8 is a high-output loudspeaker cabinet, featuring a 8" high efficiency Mid / Low range driver and 1" compression driver fitted with a 100° x 80° coverage horn, providing a powerful and detailed sound in a compact cabinet.

#### Zaal 4

Wijchen, The Netherlands

Near the marketplace of the Dutch little town of Wijchen the AUDAC Certified Partner AVplus installed and programmed a complete audio installation for a cozy bar & restaurant called "Zaal 4".

Build out of an old cinema complex that only ever had 3 theater rooms, this new bar & restaurant concept appropriately got the name Zaal 4 (which means the 4th theater room). It even has the original projector from 1912 and a lot of the other references to its old occupation, turning the establishment into a place with a very own and unique character. As it is the case with every complete concept; audio forms one of the most prominent elements in setting the right atmosphere.

With the location being used as grand café, restaurant but also as lounge bar and party venue, the choice for the right audio system wasn't an unimportant issue. After consultation with the owners of the complex, AVplus chose to go for our PRE126 user-friendly pre-amplifier. With this 6-channel sound mixer the 2 levels of the hospitality business (restaurant, lounge / party area) can be controlled separately for an optimal adjustment. An ultimate dispersion of sound is generated with a whopping amount of 14 VEXO8 compact high-power speakers and 4 BASO 15 bass reflex cabinets. The tight speaker design perfectly matches the retro cinematic atmosphere and above all this place won't fall short of sound! The whole speaker system is powered by only three SMQ750 amplifiers that are capable of delivering sufficient power to all wall speakers and the bass cabinets at the same time.

"Another advantage of this set-up is the fact that a band or dj when playing in the weekends or at an event in one of the party rooms, can very easily connect to the system due to the strategically installed XLR connection plates." says Tom Hijmans, installer at AVplus. Our partner AVplus explicitly let us know that the hosts of Zaal 4 were amazed with the sound quality and are delighted about their new sound system.

### Restaurant Dia

Kaunas, Lithuania

In the sprawling city of Kaunas (Lithuania) you will find one of the best local restaurants called DIA: a creative and tasty restaurant where they serve excellent food

This popular restaurant is equipped with AUDAC XENO8 full range speakers that blend in beautifully with the modern and cozy interior design.

Thanks to the two zone 6-channel preamplifier PRE26 and the DPA154 quad channel class-D amplifiers, the staff can easily adjust and control the sound settings in two different areas.

### Flush mount subwoofers

The CELO8S is the next step in our journey to provide an impeccable musical atmosphere. This 8" ceiling subwoofer is fitted with a stiff and light aluminum membrane, minimizing ceiling vibrations and resulting in energetic depths from above, while the open back design enables the CELO8S to reproduce low frequencies in the most natural way possible.

Its integrated stereo crossover enables you to effortlessly connect your satellite speakers, resulting in the absolute finest full-range sound experience in the most efficient way possible.

# CELO8S

High-end 8" ceiling subwoofer

To overcome the architectural challenges of the most luxurious interior designs, the CELO8S is fitted with our SlimLine™ grill design with an exceptionally thin border of only 1 mm and a minimized grill depth, extruding merely 3.2 mm from the ceiling surface. In addition, the grill is completely paintable, making the speaker disappear without sacrificing any sound quality. This elegant and unobtrusive grill is held in place by means of powerful neodymium magnets, making assembly and disassembly simple and reliable.

Without the speaker grill installed, it's clear for anyone to see that the CELO8S is made by using only the highest quality materials, guaranteeing an unsurpassed sound experience. This results in true to nature sound reproduction for a warm and detailed sound with an RMS power of 50 Watt per channel and 100 Watt when connected in parallel.

8 Qhm

"The next step in our journey to provide you an impeccable musical atmosphere."

#### 1) Phase switch

Depending on the acoustical properties of your room and placement of the subwoofer, the sub can be better integrated into your room when switched to either 0° or 180° by adjusting the phase switch. We recommend 0° when all speakers are mounted in a flat wall or ceiling.

### 2 Balance correction switch

When installed with accompanying satellite speakers, the volume of these satellites relative to the subwoofer can be increased and decreased by 3 dB, according to the installation setup and preferred sound.

# Compact bass cabinets

NOBA is characterized by an innovative & unique design. With its curved shape, made of 4 mm thick aircraft graded aluminum and its extremely powerful 8" woofer of 200 Watts, the NOBA is able to deliver an unheard low frequency response for its small woofer size.

The perfect acoustic experience is guaranteed when the entire audio frequency spectrum is equally distributed. The slick look of the NOBA allows it to be placed against a wall, on the ceiling or even underneath furniture, yet due to the unique composition of its parts, NOBA ensures a much better spreading of sound waves than other similar cabinets. NOBA's integrated class-D amplifier provides an impressive clarity of 150 Watts for both of the top speaker outputs to ensure impeccable sound division.

The brand new bass cabinet uses AUDAC's WaveDynamics™ technology, which allows the user to easily set up the optimal acoustic configuration. The user can simply load its preferred audio settings through NOBA's integrated USB input.

### NOBA8

Passive 8" bass reflex cabinet

The NOBA8 is a compact 8" bass cabinet which is characterized by an innovative & unique design. With its curved shape, made of 4 mm thick aircraft graded aluminum and its extremely powerful 8" woofer of 200 Watts, the NOBA8 is able to deliver an unheard low frequency response for its small woofer size. The perfect acoustic experience is guaranteed when the entire audio frequency spectrum is equally distributed.

200W

Available colours:

## NOBA8A

Active 8" bass reflex cabinet

The NOBA8A is a compact 8 " active bass cabinet which can be recognized by her slick look. The extremely powerful 8" woofer of 200 Watts in combination with the 4mm thick aircraft graded aluminum housing produces an unheard low frequency response. NOBA8A's integrated class-D amplifier provides an impressive clarity of 150 Watts for both of the top speaker outputs to ensure impeccable sound division.

### Het Cordaat

Hasselt, Belgium

The C.Group in Hasselt, Belgium has opened a new restaurant and bar, "Het Cordaat". The C. group is the leading corporation behind various restaurants, hotels and events in and around Hasselt. As location for their latest restaurant they have chosen the Corda Campus, the ever-growing hotspot for entrepreneurship in the technology sector.

Informal or business, at Cordaat a wide audience can enjoy a fantastic meal. There is an open kitchen that allows the guests to see the chefs in action while a large, central bar is the centre piece of the restaurant. The restaurant is also equipped with a partly covered terrace that almost all year round can be used. The kitchen is sophisticated with a wide range of specialized wines. The eye-catcher in the kitchen is the Japanese Robata grill which not only looks very spectacular but is also superb in taste.

Belgian AUDAC partner Soundstation installed a full AUDAC installation to provide the guests with suiting background music while enjoying their meals. The dining area is equipped with 16 elegant and easily installable ATEO4 wall speakers to provide a great sound. These ATEO's are accompanied with 2 NOBA8 bass cabinets. Thanks to their elegant and compact design the installer was able to incorporate these bass cabinets nicely into the interior by installing them against the ceiling. Thanks to the MWX65 all-in-one wall panel the input signals and volume can be controlled in the restaurant.

Outside the restaurant 8 WX502\_O outdoor loudspeakers were installed on the terrace. The WX502\_O are specially treated for outdoor usage so they can provide excellent sound quality in any kind of weather. During working hours, the kitchen staff can also enjoy music from the 2 WX502 speakers that are installed in the kitchen.

### Bass cabinets

The BASO cabinets are universally usable passive bass cabinets. Their bass reflex design is engineered to be as compact as possible while giving the maximum performance in terms of sound quality and pressure. Their enclosures are made of sturdy high-quality plywood while their elegant design enables them to be placed in any environment.

# BASO<sub>10</sub>

10" Compact bass reflex cabinet

The BASO10 is loaded with a 10" high-performance woofer with an RMS power rating of 225 Watt and maximum power of 450 Watt. The strength of this loudspeaker originates from a four layer wounded 1.5" voice coil in combination with an over-sized ferrite type magnet which provides an unusual high force factor. In combination with the low-loss suspension, this results in a linear behavior with high efficiency and extremely wide frequency range.

## BASO12

12" Compact bass reflex cabinet

The BASO12 is loaded with a 12" highperformance woofer with an RMS power rating of 500 Watt and maximum power of 1000 Watt. The strength of this loudspeaker originates from a 4" voice coil which is allowed to perform extra long excursions. Displacements are precisely controlled by the dual low-loss suspension resulting in a superior linear behavior.

### BASO<sub>15</sub>

15" Compact bass reflex cabinet

The BASO15 is loaded with a 15" highperformance woofer with an RMS power rating of 700 Watt and maximum power of 1400 Watt. The strength of this loudspeaker originates from a 4" voice coil which is allowed to perform extra long excursions. Displacements are precisely controlled by the dual low-loss suspension resulting in a superior linear behavior.

### BASO<sub>18</sub>

18" Compact bass reflex cabinet

The BASO18 is loaded with a 18" highperformance woofer with an RMS power rating of 900 Watt and maximum power of 1800 Watt. The strength of this loudspeaker originates from a 4" voice coil which is allowed to perform extra long excursions. Displacements are precisely controlled by the dual low-loss suspension resulting in a superior linear behavior.

### Lucy Lou Utrecht, The Netherlands

At Lucy Lou in Utrecht, The Netherlands you can experience Mexican street food and much more of the delicious Latin American cuisine. On the menu you can find authentic Mexican tacos and more than fifty varieties of tequila and mescal, this is a distilled alcoholic beverage made from agave and is originally from Mexico. At Lucy Lou you can also taste the best cocktails in town that they shake for you at their cocktail bar. Every Friday and Saturday evening you can enjoy sensual Latin American beats provided by DJ's and live bands.

Dutch AUDAC Certified Partner E&A Audioservice from Leusden was approached to put together a sound system that could be used for both background music and dance evenings. Another aspect to take into account was the interior of Lucy Lou. It had to contribute to the Mexican atmosphere in the bar/restaurant. For this reason, they have chosen the ATEO6 Wall speaker. The ATEO6 fits perfectly in the interior with its stunningly design and elegant looking ABS housing. At night the ATEO6 are supported by 2 BASO12 bass reflex cabinets 12" subwoofers to create the right vibes. The installation is powered by a PMQ480 Quad-channel power amplifier and controlled through a PRE126 two zone stereo pre-amplifier.
