**KÖNIG & MEYER**  
Stands For Music

## BUILT TO LAST

For over 70 years, we have provided musicians worldwide with unique stands and accessories of the highest quality, with renowned innovation, accompanied by superior customer service. All products, from start to finish are produced in-house using only the finest quality materials and the industry's most advanced computer-aided design (CAD) systems, laser-cutting machines, welding robots and CNC operated machines to maintain precise tolerances while ensuring employee safety and minimal environmental impact. We are determined and committed to constantly improving our customer relationship, through providing new and innovative quality products, continuance of our excellent customer support and permanent investments in our production facility located in Germany. Experience our new product developments for 2023 and discover customized solutions designed to make your everyday life easier – on stage, at the studio, or at home. We hope you enjoy using the new König & Meyer products.

König & Meyer was awarded the TOP 100 seal in 2021. This puts us in the ranks of particularly innovative SMEs from all over Germany.

For more than 70 years König & Meyer has provided musicians with unique support solutions that are crafted with unparalleled innovation and quality and accompanied by excellent customer service. We guarantee the superior quality of our products by offering a 5 year warranty (excludes lights, bulbs and batteries) and a 10-year spare parts service.

At K&M environmental protection has been a fundamental corporate goal for decades. Our unlimited commitment to quality and the environment translates into the most effective use of raw materials, saving energy, increasing our use of renewable energies, recycling components and products at the end of their lives, avoiding pollutants in production, reducing CO<sub>2</sub> emissions, lowering water consumption and treating waste water from the production process, turning it back into drinking water.

## TABLET PC HOLDER BUNDLE

23874

The comfortable solution for your workplace or home studio. With this table mount you can position a tablet with a size of 10" to approx. 16" in a space-saving and ergonomic way. The robust aluminum construction with the integrated pneumatic spring can bear a load of up to 8 kg. The tablet mount is made of bio-based plastic. These plastics contain a proportion of over 50 % up to 100 % of renewable plant-based raw materials. The use of renewable raw materials helps to conserve limited petroleum resources and reduce harmful CO<sub>2</sub> emissions. More info on bio-based plastics at: [bioplastic.k-m.de](http://bioplastic.k-m.de). The clamping range of the tablet stand holder is between 158 and 280 mm. The holder is also particularly suited for tablets with a protective cover or case up to 20 mm thickness. The overlapping clamping jaws with integrated rubber pads provide for a secure hold and eliminate unwanted vibration noises. The function of the operating elements on the device is not impaired. An adjustable mounting bracket with felt padding provides additional safety when the tablet holder is positioned vertically and prevents the tablet PC from falling out even under heavy use. The holder can be swiveled and tilted, allowing each user to position it individually. The swivel movement can be adjusted from easy to tough via a clamping screw. The tablet holder can be rotated between portrait and landscape format without further ado, whereby independent turning is prevented. For a neck-friendly posture and a perfect viewing angle, the tablet holder can be continuously tilted, rotated and swiveled. Thanks to the large stable table clamp (up to 85 mm thick), the complete holder is quickly mounted and can be used as desired. Here, a height adjustment of up to 200 mm is possible. The upper arm offers an additional 350 mm of height adjustability. The integrated cable management also ensures a tidy and professional impression.

**Bio**<sup>based</sup>  
**PLASTIC**

Clamping range: 158 – 280 mm

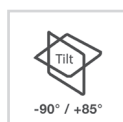

Can be rotated between  
portrait and landscape format

Material	Monitor mount aluminum, Tablet PC stand holder Bio-based plastic
Weight	3.3 kg
Special features	also suitable for tablets in cases or protective covers, dimension ~10"-16"; freely rotates 360°; continuously height adjustment of 200 + 350 mm; internal cable routing possible
Height	max. 780 mm
Height adjustment	pneumatic spring
max. load capacity	8 kg
Angle of inclination	-90° to 85°
Clamping range	up to 85 mm

## MONITOR STAND

**26722**
**TOPLINE**

Functional floor stand for near-field monitors and speakers. The solid and well-designed steel construction impresses with its stability and holds your speakers securely in the desired position. The flat tripod construction with large rubber pads ensures acoustic decoupling and a wobble-free stand. The support plate with self-adhesive rubber studs measures 280 x 320 mm. For the optimal listening height, you can choose six levels between 677 and 1132 mm. The slim clamp with safety hook is easy and comfortable to use. Alternatively, the cables can be routed inside the tube (without connector). A load capacity of 35 kg is possible when the load is centred.

Material	steel
Weight	5.5 kg
Special features	internal cable routing possible; support plate with rubber bumps; for stationary use
Base diameter	690 mm
Bearing plate	280 x 320 mm
Height	from 677 to 1,132 mm
Height adjustment	locking screw and safety hook
Leg construction	fixed screw-in legs
Max. load capacity*	35 kg
Number of legs	3
Rod combination	2-piece folding design

## SPEAKER WALL MOUNT M

**24166**

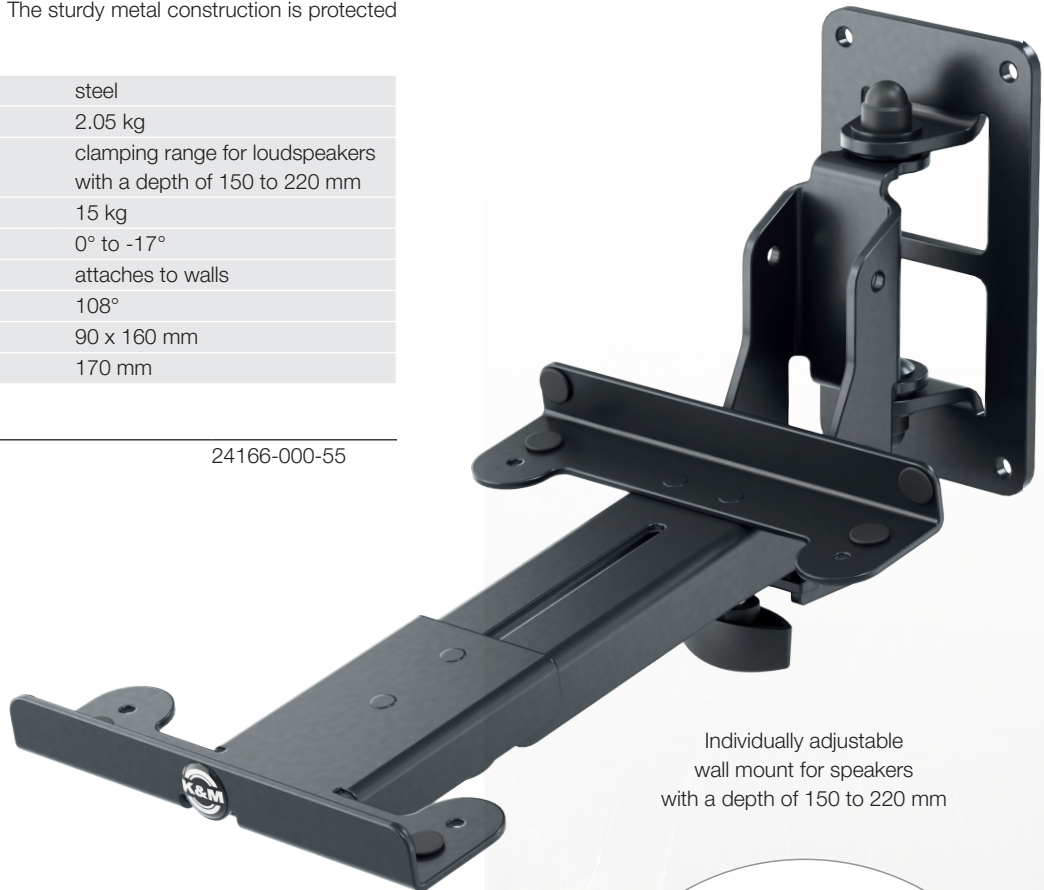

Solid and stable wall mount with adjustable boom for monitors and speakers up to 15 kg. The boom can be swiveled on both sides up to 54° and tilted continuously up to -17°. The width is 170 mm and the clamping depth ranges from 150 to 220 mm. Self-adhesive rubber pads protect the surface of the box and prevent vibration noise. User-friendly controls allow quick and convenient adjustments, which also remain fixed thanks to additional counter options. The sturdy metal construction is protected by a durable powder coating.

Material	steel
Weight	2.05 kg
Special features	clamping range for loudspeakers with a depth of 150 to 220 mm
Max. load capacity	15 kg
Angle of inclination	0° to -17°
Mounting	attaches to walls
Swivel	108°
Wall plate	90 x 160 mm
Width	170 mm

## COVER FOR SPEAKER WALL MOUNT

**24463**

Attractive cover for speaker wall mounts with a wall mounting plate of 160 x 90 mm (e.g. 24471). This cover conceals the fastening parts of the wall mount and thus visually enhances it. The cover can be easily and quickly attached to the installed wall mount and removed again for service work. No tools are required for installation, as the robust cover made of impact-resistant plastic is fastened with magnets. Several cable outlets are provided for concealed cable routing.

Material	plastic
Weight	0.061 kg
Special features	suitable for all wall mounting plates with dimensions of 160 x 90 mm; no tools are required for installation; fastened with magnets, several cable outlets are provided for concealed cable routing
Dimensions	95 x 38 x 166 mm

## SPEAKER WALL MOUNT

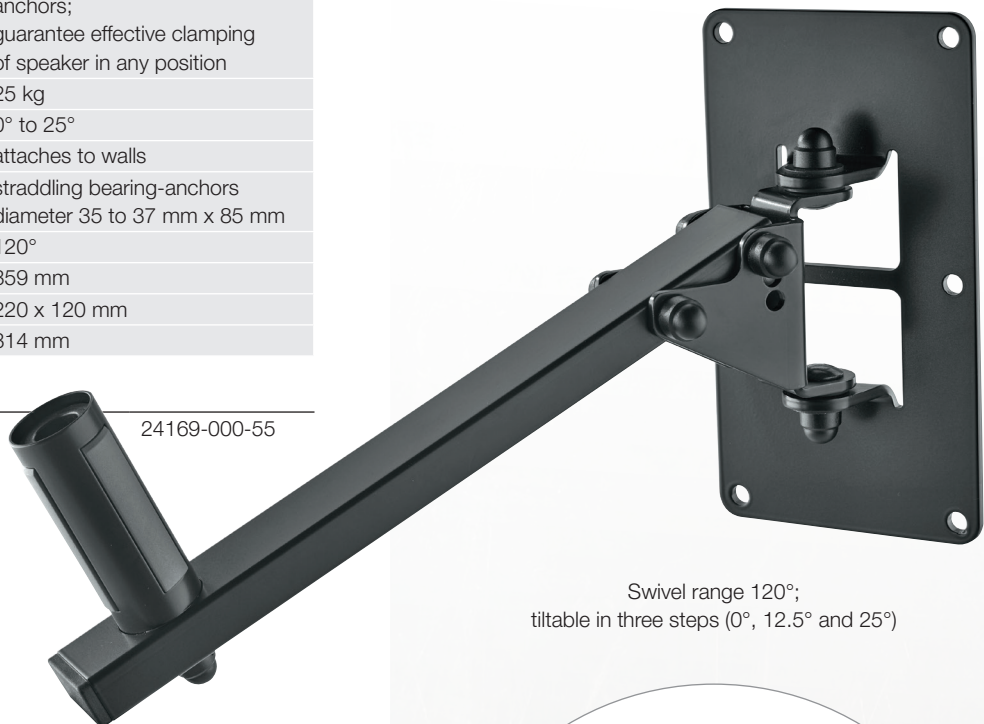

**24169**

Robust wall mount for holding speakers with flange socket up to 25 kg. The swivel range is continuously adjustable up to 120°. The tilt can be fixed in three steps with 0°, 12.5° and 25°. A patented expanding mandrel ensures a wobble- and vibration-free fit of the speaker. The solid steel construction and durable powder coating ensure long-lasting use.

Material	steel
Weight	2.0 kg
Special features	patented straddling bearing-anchors; guarantee effective clamping of speaker in any position
Max. load capacity	25 kg
Angle of inclination	0° to 25°
Mounting	attaches to walls
Mounting bolt	straddling bearing-anchors diameter 35 to 37 mm x 85 mm
Swivel	120°
Wall clearance	359 mm
Wall plate	220 x 120 mm
Wall-to-bolt clearance	314 mm
